# ColorSource PAR

*“Our ColorSource lights output beautiful, high-quality light that we simply couldn’t find with other four-color LEDs.”*

You want new lighting, with good colors, but you don’t have much of a budget?

***ColorSource PAR sheds a new light.***

### **RGB with a twist... of lime!**

ColorSource® PAR shines with brighter, richer, and more diverse colors. Most budget LEDs use red, green, and blue emitters, possibly with white or amber thrown in, limiting their color output. But ETC uses lime to add more color capability, while preserving the bright output needed from a washlight.

### **Smooth operator**

You can integrate ColorSource PAR into your system with ease. With an intuitive interface right on the fixture, you can plug it in, press some buttons and have it shining bright colors in no time. And with power in and thru, DMX in and thru, and a variety of optics, it’ll blend right into your lighting rig.

### **More than just an LED – it’s an investment**

ETC manufactures each ColorSource PAR to extensive design and rigorous testing standards, optically calibrating each one to guarantee the same dependable color from every unit. And as always, ETC stands behind ColorSource PAR with industry-leading technical service and customer support, available to you 24/7/365.

### **Product Features**

- Easy-to-use RGB control
- RDM capability
- Power in and thru with Powercon
- DMX in and thru
- Low-noise fan operation
- Droop compensation for consistent output
- Optically calibrated
- Homogenized optics
- Beam can be shaped with available diffusion
- Available in black, white and silver (custom colors also available)
- Also available in a “Deep Blue” LED array option
