ColorSource Linear

"Our ColorSource Linear gives us the ability to build an endless beam of beautiful, high-quality light."

Your list of requests is long; new lighting, with good colors, on a small budget, that fits in tight spaces...

ColorSource Linear adds new options you'll be hard pressed to find anywhere else...

RGB in a flexible package

Like the other fixtures in the ColorSource® family, ColorSource Linear shines with brighter, richer, and more diverse colors. Most budget LEDs use red, green, and blue emitters, with white or amber possibly thrown in, limiting their color output. But ETC adds lime for more color capability, while preserving the bright output needed from a washlight.

This popular fixture fits in anywhere

The low profile ColorSource Linear fixture can be quietly tucked away into hard to fit spaces. The single-row LED array is perfect for dance shows with small wing space, cafeteria stages with limited masking, and foot lights of any stage!

An investment in quality

ETC manufactures each ColorSource Linear to extensive design and rigorous testing standards, optically calibrating each one to deliver consistent color from every unit. And as always, ETC stands behind ColorSource Linear with industry-leading technical service and customer support, available to you 24/7/365.

Product features

- Available in .5 meter, 1 meter, and 2 meter lengths
- Easy-to-use RGB control
- RDM capability
- Power in and thru with powerCon
- DMX in and thru
