Source Four LED Lighting System

Light that ought to be in pictures

Daylight HD and Tungsten HD arrays

Key lighting with professional level optics

- Designed specifically for studio
- Tested flicker-free 25k mode refresh rate, verified for rolling shutter and Hi-speed full HD cameras
- Variable color temperature and tint adjustment (+/- green)
- Quiet operation with extremely low fan noise
- Accepts all accessories and adapters for unmatched flexibility

Lustr array

Incredible colors for wash and backlight

- x7 Color System™, for the broadest range of color and impressive white light
- Accepts all accessories and adapters for unmatched flexibility
- Variable temperature white light (2700K-6500K)

Source Four LED adapters convert your profile to any task

One light engine, a wealth of possibilities

- Fresnel adapter for smooth washes with soft edges and a controllable beam
- CYC adapter optimizes the incredible optics for seamless green screen and background lighting
- Interchangeable zoom and fixed-focus lenses adapt your profile for any position in seconds

"The color consistency between fixtures is amazing, providing a perfect 5600k on a vector-scope, as well as all the beautiful colors that a 7 LED system can provide."

– Mathew Stovall, co-lighting designer for Riot Games, North American and European LCS Studios

"The cyc adapter produces the most even wash of light I've seen, with an incredible optics design that virtually eliminates scalloping. There's no other fixture I'd rather use to light a cyc than this one."

– Craig Kief, Director of Photography, *The Muppets*, ABC Studios
